

## Technical Bulletin # 10

20th October 2008

### **Compatibility with Bituminous-based flashing systems**

Bituminous-based flashing systems such as Protectowrap are not compatible with Dec-K-ing, Butylclad, Epiclاد, or Enviroclad.

When the above-listed membranes are turned into an opening where products like Protectowrap are to be installed, please advise the builder to isolate the two surfaces with the backing paper to avoid contamination of the membrane.

The Skellerup product warranty will be void if Bituminous based flashing systems are not isolated from our above products.
